Hiring Team - Professional & Financial Services

Faculty

London

Dear Hiring Team,

I'm applying for the **Lead Data Scientist** role at Faculty. The combination of end-to-end data science ownership, commercial focus, and a high-autonomy environment maps directly to the way I've worked over the past five years.

Three proof points that map to the role:

Marketing & commercial DS (Syncwell, UK, 2024). Built predictive models for engagement and campaign targeting; ran A/B tests to validate uplift; shipped automated trigger logic that drove **+40% click-through** and **+22% follower growth**.

Production ML under scrutiny (Bank Muamalat, 2019-2022). Led NLP credit-analysis and market-segmentation models in production: monitoring, retraining, drift detection, compliance documentation. Portfolio adjustments delivered **+5.3% investment return**.

Attribution & automation (PCOS Challenge, UK, 2024). Developed customer-attribution model linking donor touchpoints to conversions; automated reporting pipeline cut manual workload by **80%**.

On location: I'm based in Milan with EU work rights and a UK Graduate Visa from my MSc at Aston (1:1 First Class), so I can work across UK and EU without sponsorship complexity.

I'd love to talk about which problems are highest priority on the team right now and where a strong end-to-end data scientist can move the needle in the next two quarters.

Thank you for the consideration.
